**BUILT**

**T U G H**

**AND BUILT TO LAST**

**Tough. It's in our DNA.**

In 1963 we developed the first purpose-built hydraulic knuckleboom loader to make loggers' jobs easier. Since then, we've built over 25,000 of the most durable and reliable machines for the forestry, site prep, and material handling industries. All proudly assembled right here in the USA.

# A FOUNDATION OF TRUST

**It is personal, it's business.** We're proud to be a part of the Heico Companies, a family owned business that treats its businesses like family. Heico is the parent holding company of a diverse portfolio of manufacturing, construction, and industrial services businesses. Heico was founded by Michael Heisley in 1979, when he sold his home and used the proceeds to buy his first company. As a buy, hold, and build investor, Heico has since grown to include over 40 companies and 9,000 employees, with operations in 18 countries, generating \$2.5 billion in annual revenue. This ownership structure allows us to retain our small company focus and agility while giving us access to large company resources to achieve our goals. We call that the best of both worlds.

# FOCUSED

## OUR VISION

To improve the lives of industry professionals by providing tools to be more successful, comfortable, and safe.

## OUR MISSION

- ➔ Deliver products built for operators.
- ➔ Push boundaries related to fuel efficiency, hydraulics, ergonomics, and connectivity.
- ➔ Be responsive and easy to work with.
- ➔ Understand our customer's business.

BARKO

# PRODUCT LINE-UP

Our machines are purpose-built to withstand the most severe operating conditions while providing safety and comfort for the operator. We stand behind our products with one of the most robust warranties on the market. Every machine we build was influenced by industry professionals, designed to meet operators' unique needs in the field, and tested to be sure we got it right.

## 1 MERCHANDISING LOADERS

Barko Merchandising Loaders feature a hydraulic system that is optimized to perform efficiently, operate smoothly, and deliver more loads each shift. Balancing raw lifting power and strong swing torque with fuel efficiency and operator comfort, these loaders have the upper hand in even the toughest conditions. A variety of mounting configurations and options are available to tailor these loaders to your specific needs.

## 2 STATIONARY LOADERS

Barko Stationary Loaders offer the same great performance as our Merchandising Loaders at a lower overall operating cost. Available with either diesel or electric power units and cab-on or remote-control configurations, these versatile loaders are well suited for material handling tasks in mill yards, scrap yards, and waste/recycling facilities. On average, Stationary Electric Loaders typically cost 50% less to operate than diesel-powered loaders due to lower electricity costs and less maintenance.

## 7 GRAPPLES

Barko Grapples offer highly productive attachment solutions for log handling and loading applications. Designed to optimize the performance of Barko loaders, each grapple delivers superior rotator torque and excellent arm speed while being backed by an industry-leading warranty. Simple hose routings provide added protection to prevent damage during operation.

✓ PURPOSE-BUILT

✓ FUEL EFFICIENT

✓ PRODUCTIVE

✓ SERVICEABLE DESIGNS

✓ OPTIMIZED PERFORMANCE

✓ ENHANCED OPERATOR COMFORT

## 3 UTILITY LOADERS

Barko Utility Loaders combine low installation weight with high lift capacity, providing a versatile solution for all your material handling needs. Delivering consistent multi-function performance and equipped with standard features that set them apart from the competition, these efficient loaders deliver maximum productivity. Every Barko Utility Loader ships from the factory fully assembled, tested, and ready to install.

## 6 INDUSTRIAL TRACTORS

Barko Industrial Wheeled Tractors give you more power for land clearing, site prep, vegetation management, and right-of-way maintenance work. With superior hydraulic horsepower to the attachment, operators can tear through the toughest terrain with ease. These versatile machines are highly maneuverable and feature a spacious cab with an ergonomic control layout that keeps the operator comfortable all day long.

## 5 TRACKED HARVESTERS

Barko Tracked Harvesters & Feller Bunchers offer a fuel-efficient combination of brute strength, boom reach, and lighter overall weight to deliver exceptional performance in a more compact package. Visibility from the operator's seat is second to none, and standard features like the patented forward sliding cab design and gullwing engine door make regular maintenance and repairs simple.

## 4 WHEELED FELLER BUNCHERS

Barko Wheeled Feller Bunchers deliver maximized attachment performance and fast saw recovery intervals for increased productivity. The 830B model is powered by a Cummins® QSL9 Tier 4 Final engine that delivers the highest horsepower on the market. Designed with a robust center joint and improved weight distribution, these machines are built for maximum stability even when handling large loads.

# THE RIGHT SIZE TO BE **RESPONSIVE**

We are not the largest equipment manufacturer, and that's fine with us. We see our size as our competitive advantage as it allows us to stay on the cutting edge of innovation while understanding our customers' needs and responding quickly. We've cultivated a strong network of dealers, some of whom are loggers themselves, who are proud to represent the Barko product line. Together, we strive to provide industry-leading equipment and support when you need it most.

“ We like that Barko is big enough to put people and resources behind their products but small enough to know their customers. That means a lot to us. ”

Jack Bell | Long View Forest  
Westminster, VT

“ Barko has a long history of developing and providing the high-quality products our customers need to be successful. ”

TraxPlus  
Hickory, MS

“ Innovative design, strong product support, and parts availability are just a few reasons why we value partnering with Barko. ”

Tommy Moore | Equipment Linc  
Maplesville, AL
