

# » QUICK ATTACH

The Barko® Quick Attach gives users the flexibility to quickly and easily change between industrial tractor attachments for varying job requirements. With customizable specifications and the ability to deliver variable hydraulic flow and pressure, the Quick Attach can universally accommodate the requirements of any common attachment.

## HYDRAULIC CONTROL SYSTEM & DISPLAY

- > Patent-pending system offers variable hydraulic flow and variable hydraulic pressure.
- > Select adjustments on 3.5-inch display mounted inside the cab; no manual pump or hydraulic system adjustments.
- > Shows hydraulic flow and pressure settings at all times.
- > Safety prompts ask operator to verify setting selection to avoid flows or pressures that could damage attachment.
- > Optional tachometer readings to monitor attachment speed.

### DURABILITY

- Robust steel design with durable 2-inch pins helps withstand jobsite abuse.
- Cylinders and actuating mechanisms are guarded inside the coupler to minimize debris accumulation.

### APPLICATIONS

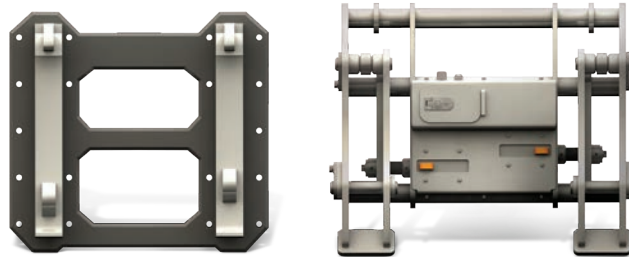

The Quick Attach provides attachment adaptability for a wide range of applications, including land clearing, right-of-way maintenance, snow removal, utility work and even farming.

#### Common attachments:

- |                    |                  |
|--------------------|------------------|
| • Mulching Heads   | • Loader Buckets |
| • Rotary Mowers    | • Root Rakes     |
| • Rock Crushers    | • Snow Plows     |
| • Soil Stabilizers | • Sweepers       |
| • Stump Grinders   |                  |

## USER-FRIENDLY MECHANICAL INTERFACE

- > Self-aligning mechanical adaptor plate for fast, efficient attachment changes.
- > Visual indicators allow operator to see, from the cab, when interface is coupled or decoupled; faster than manual pinning.
- > Mechanical interface is compatible with common attachments from major manufacturers.
- > Hydraulic quick couplers for clean and easy plumbing changes.
- > Customized as needed for various user requirements.
